

TARGET
INTERNATIONAL

// About Us

TARGET INTERNATIONAL

Leading company in the United Arab Emirates – based in Abu Dhabi
We, at TARGET INTERNATIONAL will certainly continue to do what we do best; to ensure the high level of excellence and quality in our MEP projects and in the delivery of value-added during installation, testing and commissioning, Maintenance & preventative maintenance,

TARGET INTERNATIONAL promises its clients and costumers to maintain the core advantages that have distinguished our company as one of the leaders in the Building MEP Engineering

OUR HISTORY

We grew alongside this country's rapidly growing industries as they reached their peaks, and then we quickly adapted as new industries came to prominence and others declined.

TARGET INTERNATIONAL team have applied MEP design and consultation to a wide range of fields, and can apply best practices across market sectors: commercial, retirement living, multifamily housing, special designs according to special interior design requirements.

Our Vision & Our Mission

Buildings are responsible for 50% of global energy use, and over of 30% of water use in the United Arab Of Emirates,

The absolute figure is rising at a fast pace, driven by several adverse megatrends such as population growth, country visitors, urbanization and economic development in emerging the united Arab Emiratis and the aging of the building stock in developed or renovated, combined with further growth in the use of services and appliances.

Mechanical and electrical systems have a great impact on the building sector's consumption of resources and subsequent global major effects in case if it was designed by non-experts or a company how don't have the United Arab Emirates experience.

At **TARGET INTERNATIONAL**, we believe that sustainable "green" buildings represent a huge opportunity that brings not only environmental but also economic and social benefits and as gratitude to this great nation.

Sex Male | Date of birth 05/01/1994 | Nationality Syrian.

WORK EXPERIENCE

February 2021 - Present

Target International L.L.C, Abu Dhabi.

targetinternational.ae

HVAC Engineer

- Planned the placement of AC units, pipework, ducts and control panels.
- Coordinated with other disciplines and ensured site clearance is available to start the HVAC activities.
- Carry out maintenance works for chillers and split units.
- Closely monitor site activities to ensure quality of work is in compliance with approved shop drawing and Specification.
- Assist the Commissioning Team on Testing, Adjusting & Balancing (TAB)

February 2020 - January 2021 IPCO Electromechanical Contracting L.L.C, Abu Dhabi.

ipco-group.com

MEP Engineer

- Reviewing the Mechanical documents to ensure compliance with commissioning standards and specifications.
- Generated weekly progress reports for the manager.
- Inspected material at site and bill checking.
- Conducted industry research to identify potential suppliers
- Evaluated suppliers based on products, services, and prices
- Negotiated contracts/agreements for purchasing of

August 2016 - January 2020 Technical Equipment Office (TEO), Damascus, Syria.

teo-bo.com

August 2018 - January 2020

HVAC Site Engineer

- Coordinated with all disciplines and external stakeholders to ensure the layout of MEP services are feasible.
- Produced shop drawings and as-built drawings (2D and 3D).
- Installed and operated VRF air conditioning systems.
- Tracked weekly target

August 2016 - July 2018 HVAC Design Engineer

- Engineered drainage and Heating, Ventilation, and Air Conditioning systems, including load calculating, zoning, equipment selection, pipe and duct sizing.
- Conducted feasibility studies to estimate materials, time and labour cost.
- Priced, monitored and submitted Bill of Materials.

Projects

- Installed HVAC System at ADNOC Gulf Club (Al Ruwais, Abu Dhabi).
- Installed HVAC Systems for VIP Villas in Abu Dhabi such as (NUDRA “Al Saadiyat Island”, KMV “Al Reem Island”).
- Implemented MEP system for Al-Ain Co-operative Society Store (Kizad, Abu Dhabi).
- Designed HVAC system with chilled water technology (250 TOR total cooling capacity) for Proline Pharma factory (Adra Industrial City, Syria).
- Arranged Mechanical technical specifications and tender drawings for Al-Rawda Palace, Banque Bemo Saudi Fransi, and Presidential Palace (Damascus, Syria).
- Developed concept study for Semiramis Hotel Palmyra (107 rooms) (Damascus, Syria).
- Implemented HVAC systems for Banque Bemo Saudi Fransi and Dar Al-Shifaa Hospital.
- Installed VRF systems for 60 offices in Presidential Palace (Damascus, Syria).
- Tested and commissioned for the pressurization and the air systems for Proline Pharma factory (23 air handling units (AHU)) (Adra Industrial City, Syria).

EDUCATION

January 2017 - Present

Master's degree in Refrigeration Engineering

Damascus University, Damascus (Syria).

October 2011 - October 2016

Bachelor's in Mechanical Engineering

Damascus University, Damascus (Syria).

Graduation Grade 80%.

TRAINING COURSE

August 2017 - 40 hours

STULZ training

STULZ GmbH, Damascus (Syria).

PERSONAL SKILLS

Languages

Arabic.
English.

Computer skills

- Microsoft Office™ tools (Word™, Excel™, and PowerPoint™).
- Hourly Analysis Program (Carrier HAP).
- Autodesk AutoCAD.
- QuickBooks.
- VRV Units Selection Software for (Daikin, General, Samsung, Midea, and LG).
- ASHRAE Duct Fitting.
- Microsoft Project.
- MEP Revit on a basic level.

Further skills

- Skilled in setting priorities within workload areas and schedule time accordingly.
- Assessment project requirements.

Driving license

- Valid UAE Driving License available

MEMBERSHIPS

Order of Syrian Engineers and Architects.

COLLABORATION

LEADERSHIP

SKILL

Our team's skills are built on strong technical expertise, hands-on experience, and a commitment to quality excellence. We deliver reliable HVAC and MEP solutions that meet client expectations and industry standards.

CREATIVITY

Our creativity as a team drives innovative MEP solutions. We combine technical expertise with smart design thinking to deliver efficient, cost-effective, and sustainable results for every project.

RESEARCH

Our research-driven team continuously studies new technologies, industry standards, and best practices to deliver efficient, reliable, and future-ready MEP solutions.

COLLABORATION

Collaboration is the foundation of our success. Our team works closely with clients, consultants, and partners to deliver efficient, high-quality MEP solutions that meet project goals and timelines.

LEADERSHIP

Strong leadership guides our team with clear vision, integrity, and accountability. Our leaders empower teams to deliver high-quality MEP and maintenance solutions safely, efficiently, and on time.

COMMUNICATION

Effective communication is key to our success. Our team ensures clear coordination, timely updates, and transparent interaction with clients and stakeholders to deliver projects efficiently and accurately.

VISION

Our vision is to be a trusted leader in air-conditioning contracting and maintenance by delivering innovative, reliable, and sustainable MEP solutions that create long-term value for our clients.

GOALS

Our goals are focused on delivering high-quality MEP and maintenance solutions, exceeding client expectations, and maintaining the highest standards of safety, efficiency, and professionalism.

General Equipment

1. HDPE Pipe Welding requires butt fusion machines, electrofusion control units, socket fusion tools, or extrusion welding guns depending on method.
2. Essential HDPE accessories include heating plates, scrapers, clamps, rollers, and measuring tools.
3. General safety gear like gloves, goggles, helmets, and shoes is needed for all welding methods.
4. GI Duct Installation uses fabrication tools (cutters, benders, grooving and lock machines) for sheet metal ducts.
5. Installation tools include drills, screwdrivers, riveters, impact wrenches, and grinders.
6. Duct support requires rods, clamps, Unistrut channels, vibration isolators, and fasteners.
7. Sealing and insulation involve duct sealant, aluminium tape, insulation knives, staple guns, and measuring rollers.
8. Safety in duct work requires ladders, scaffolds, lifters, and protective equipment.
9. Steel Pipe Welding materials include pipes, elbows, tees, reducers, flanges, and fittings.
10. Welding consumables, jointing gaskets, supports, coatings, and safety tools complete the steel pipe installation kit
11. Duct cleaning tools include rotary brush machines, high-powered vacuum units, air whips, and blow guns for loosening and extracting dust.
12. Additional aids are inspection cameras, flexible rods, and disinfectant sprayers for hygiene.
13. Measurement tools for testing and commissioning, Bolometer, hygrometer and anemometer.
